

Symbolic image - heavy-duty pallets version 2020

### Large barrier elements with a small footprint?

There is also a new, clever logistics concept to go with the new ARMIS ONE. The specially designed heavy-duty pallet enables space-saving storage of the barrier element (including foldable ramps and accessories) and ensures safe transport. As the pallets can also be stacked on top of each other, the storage space required is reduced to an absolute minimum.

### Safe transport

Bring the barrier elements safely to the place of use: The pallets also serve as transport protection – so the barrier

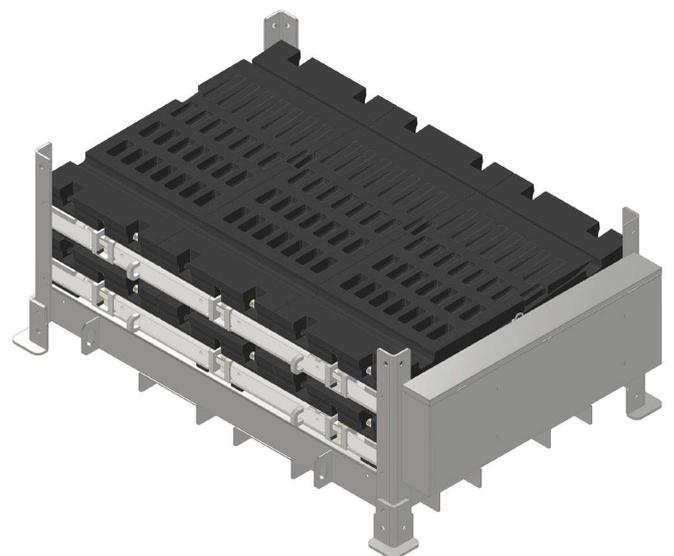

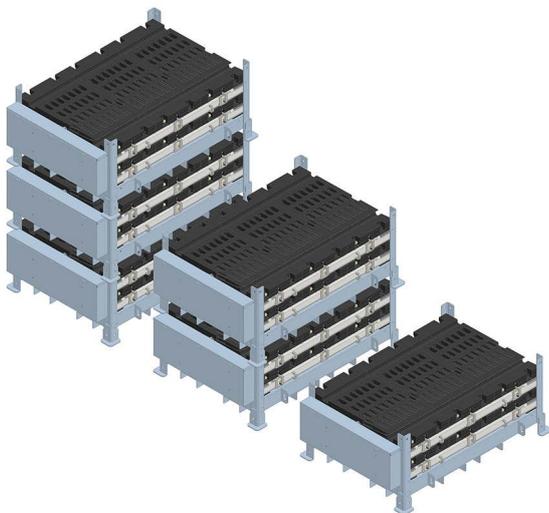

elements and accessories inside the pallets are perfectly protected.

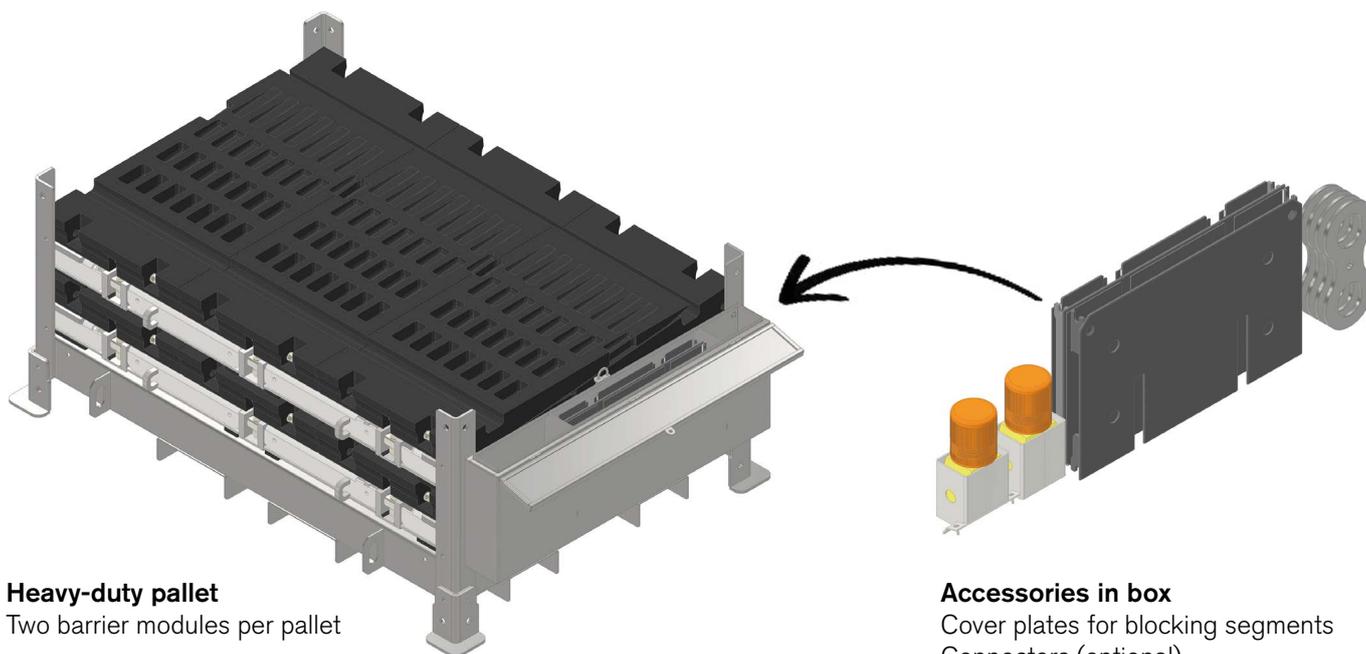

### Easy to move

For transport, the pallets can be lifted and positioned on all sides using a forklift truck, suitable lifting equipment or a small crane.

### Cover sheets (optional)

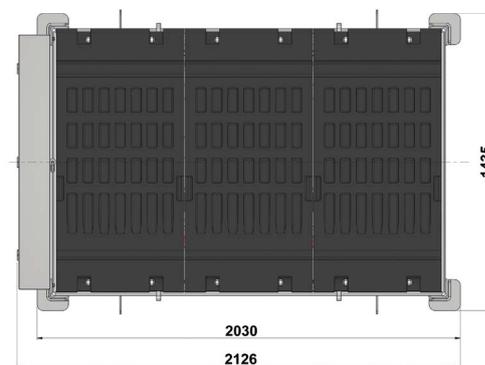

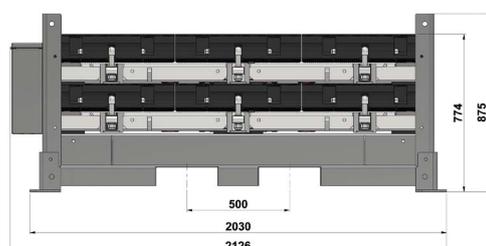

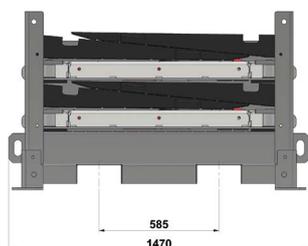

Optional cover sheets provide additional protection for the barriers and pallets against dirt and moisture.

**Heavy-duty pallet**  
Two barrier modules per pallet

**Accessories in box**  
Cover plates for blocking segments  
Connectors (optional)  
Lamps (optional)

Technical specifications

Construction	Stackable pallet made of solid steel construction, hot-dip galvanised (corrosion-resistant) with eyelets for lifting equipment and areas for forklift transport from all sides. Padlockable storage box for accessories.
Dimensions pallet	2126 x 1470 x 875 mm
Empty pallet weight	230 kg
Weight pallet filled (2 elements incl. accessories)	1770 kg (accessories approx. 30 kg)
